SKILLS

- Python, Java, JavaScript, CSS, HTML
- Libraries: TensorFlow, Keras, NumPy, Pandas
- Specializations: Deep Learning, Lightweight CNN Model, CNNs
- Strong decision maker
- Creative design
- Service-focused

LANGUAGES

- English: Fluent
- Korean: (TOPIK level 4)
- Persian (Farsi): Native

HOBBIES

- Traveling
- Mountain Climbing
- Sport
- Photography

OBJECTIVE

Detail-oriented Software Engineer and Graduate Researcher specializing in lightweight deep learning and computer vision. Proven competitive programmer (5th place ACM International Programming Contest) and award-winning researcher with a KCI journal publication and conference Best Paper Award. Experienced in data preprocessing, model optimization, and mobile app development using Android Studio for real-world deployment.

EXPERIENCE

Graduate Research Assistant

IT Applied Engineering Lab, JBNU | Mar 2025 – Present

- **Core Research:** Specialized in lightweight deep learning and computer vision for real-world object.
- **Publications:** 1 KCI journal paper and 4 conference papers.
- **System Development:** Engineered data preprocessing pipelines and optimized CNN model architectures to achieve low-latency inference on edge/mobile devices.

EDUCATION

Jeonbuk National University | Jeonju, South Korea

Master degree in IT Applied System Engineering | [Expected Graduation: 2026.12]

Bachelor of Software Engineering | 2020

Khatam al_Nabieen University | Kabul, Afghanistan

AWARDS

- **Best Paper Award**, KIEE Autumn Conference | Oct 2025
- **Excellent Performance Award**, Global Inbound Start-up Idea Competition | Nov 2025
- **5th Place**, ACM International Programming Contest | 2019
